This Project is funded by the European Union and implemented by the European Union Intellectual Property Office (EUIPO)

Why do we need design search and good search databases?

1. To check whether a design is new and original (possesses individual character);
2. To check whether the term of protection of a design expired;
3. To define a design protection strategy;
4. To prepare legal action against anyone using an identical or similar design by the owner of a registered design
5. To monitor existing competing design products.
